

ADVICE ON LARGE-SCALE BATTERY STORAGE

We advise project developers of large-scale battery storage facilities on all issues relating to project development, such as issues relating to authorisation law (including representation in any opposition and complaint proceedings), issues relating to securing land, including land register law, cooperation and structuring, construction contract law, maintenance and operational management and issues relating to grid connection.

Experience includes:

- ECO STOR GmbH Kirchheim near Munich: Ongoing advice on the development and realisation of several large-scale battery storage systems
